IDREEZ YUSUF

idreezyusuf@yahoo.com | +2347060499261 | Nigeria

Summary_____

Unique Frontend Software Engineer with comprehensive experience in designing, developing, and maintaining web applications. Skilled in modern coding languages, methodologies, frameworks such as React, JavaScript, Supabase, NodeJs, Tailwind etc

Skills_____

- ✓ JavaScript
- ✓ React
- ✓ HTML5/CSS3
- ✓ Tailwind CSS
- ✓ Nodejs
- ✓ Supabase
- ✓ Redux
- ✓ MongoDB

Experience/Projects _____

❖ Hotel Management system

- Set Up the Project structure (React/styled component, Tailwind, etc.)
- Designed the **Landing Page** (hotel intro, features, gallery)
- Created **Room Listing Page** (available rooms, room types)
- Built **Room Detail Page** (photos, amenities, price)
- Developed **Booking Form** (date picker, guest details, payment info)
- Implemented **User Authentication** (signup/login/reset password)
- Create **User Dashboard** (view bookings, cancel bookings)
- Implemented Admin Interfaces such as:
  Add/Edit/Delete Rooms
  View/manage reservations
- Built **Contact Us Page** (form + map)
- Integrated **Payment Gateway UI** (mock-up)
- Implemented the Notifications/Toast (booking confirmed, error messages)
- Responsive Design (Mobile, Tablet)

- ❖ Restaurant Ordering
  - Project structure set Up
  - Creating **Restaurant Homepage** (menu highlights, promo banners)
  - Built the **Menu Page** (categories, dishes, search/filter)
  - Developed the **Dish Detail Modal/Page** (add to cart, customize order)
  - Created the **Cart Page** (item list, quantity adjustment, total price)
  - Built the **Checkout Form** (delivery/pickup options, address input)
  - Implemented **User Authentication** (optional: login/signup)
  - Created **Order Tracking Page** (status updates: preparing, out for delivery)
  - Admin Interfaces such as:
    Manage menu (add/edit/remove dishes)
    View incoming orders
  - Notifications and pop ups (order placed, order delivered)
  - Responsive UI (essential for food apps)

- ❖ Travel & Tour
  - Project structure set up
  - Build **Landing Page** (destinations, packages, testimonials)
  - Create **Destination Listing Page** (filters: budget, activities, location)
  - Develop **Package Detail Page** (itinerary, price, what's included)
  - Created the **Booking Flow**:
    Date selections, Number of travellers, Traveler information form
  - Implemented the **User Authentication** (manage trips/bookings)
  - User Dashboard: Upcoming Trips, Past Bookings
  - Admin Panel:
    Add/Edit/Remove Tours, Manage Bookings
  - Responsive Design (especially for mobile travellers)
  - Payment Integration UI
  - FAQs, Terms & Conditions, Help Centre Pages

- ❖ CBT System Exam
  - Project architecture and set up
  - Created the **Landing/Login Page** (exam candidates' login)
  - Build **Dashboard** (available exams list, exam history)
  - ✓ Develop **Exam Interface**:
  - ✓ Timer
  - ✓ Question pagination/navigation
  - ✓ Multiple-choice answers
  - Create **Result Page** (score, review questions)
  - ✓ Admin Interface:
  - ✓ Create/Edit Exams
  - ✓ Add/Manage Questions
  - ✓ View Candidate Results
  - Implement Countdown Timer (Auto-submit exam on timeout)
  - Responsive Design (especially for tablet use during exams)
  - Alerts/Toasts (submission success, warnings)

Education _____

KWARA STATE UNIVERSITY | MALETE

B.ENG in Mechanical Engineering

- Relevant coursework: C, C++
- Grade: First Class Honors (Best Graduating Student).

Experience(s) _____

Newcore Technologies (2019 - Present).

- Worked as a frontend developer on Web applications, to meet workflows, as per business requirements Work with a variety of different languages, platforms, frameworks, and a version control system, such as TypeScript, Tailwind CSS, React, Git, and GitHub Summary Skills Experience Interacted with end-users to ensure technical compatibility and user satisfaction with designed solutions. Worked closely with product owners, designers and other stakeholders throughout the development process. Designed and implemented interactive user interfaces for websites and applications. Developed reusable components that can be used in future projects with minimal effort.

- Designed and implemented interactive user interfaces for websites and applications. Created custom responsive designs that optimized the website layout for various devices. Developed reusable components that can be used in future projects with minimal effort. Collaborated with back-end developers to integrate user interface elements into applications. Participated in daily standup meetings with project stakeholders to discuss progress updates. Working with Software Engineering team in the development of the In-house Workflow Manager Improved the quality of product, mastered various technologies.

- Mentored and tutor interns, help with project management, supervise projects and help with outreach optimization, contributed to over 50 projects for clients and interns

Freelance

- Contributed to the development and improvement of In-house Products alongside the Software Engineering team Collaborate with engineers and designers to enhance and innovate product development. Worked closely with product owners and stakeholders to ensure requirements were met. Optimized website performance by identifying bottlenecks and implementing solutions. Helped the company gain more insight on the products by integrating various Analytics tools, such as Google Analytics, Facebook Pixel, Facebook Conversions API Integrate forms with Google Sheet and Slack(channels) for more effective optimization Lead scrum meetings occasionally Building the company.
